

THE TOP 3 CRYPTOTRUTHS

TRUTH #1:

Cryptos are owned by the crowd

Cryptocurrencies are not owned by any government, bank or big institution. People are recognizing these currencies are free of institutional shackles, and are buying more and more of them.

TRUTH #2:

The key to Crypto's success is structure

The success of these currencies is due to the **decentralized knowledge** that they allow. In cryptocurrencies, the know-how is shared, hence there is not a small group of experts deciding the future of the currency. This requires a strict structure of verification through hashes and secure distribution of information to work.

TRUTH #3:

Cryptos are a long way from being stable

New cryptos come along every day. Others are being improved. If you want to invest, understand the volatility that's a big part of the crypto market. **Be careful with your investment strategy.**
